

simplehuman®

quick start

1 insert batteries

- insert 4 AA batteries as shown

Note: Only use alkaline batteries.

2 fill the pump

- lift off the lid to fill the pump

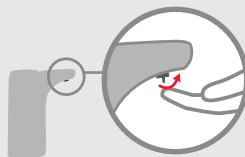

Note: Do not use soap with exfoliants, and be careful not to overfill.

3 prime the pump

- place your hand under the sensor
- hold down **+** button until soap comes out

tip: priming problem?

If the soap doesn't flow, lightly flick the valve opening to release any trapped air.

adjust the volume

To change the amount dispensed, press **+** or **-** buttons on the top of the pump.

on/off

Press and hold **-** button to turn the pump off, press **+** button to turn on.

continuous dispensing

Press and hold **+** button to dispense soap continuously.

low battery alert

LED will turn red during operation to indicate low battery.

A black and silver sensor pump dispenser is shown on a dark countertop next to a chrome faucet. The dispenser has a clear window showing the liquid inside. The background is a blurred kitchen sink area with a white sink and a green plant.

use & care

- Your sensor pump dispenses soap or lotion. Please keep it simple: avoid soaps with exfoliants or beads.
- To clean, wipe pump with a damp cloth—do not submerge in water or use in a shower.
